# 1. Call - 2024: Transforming Food Systems: Reshaping Food System Interactions, Fostering Food Innovations, and Empowering Sustainable Food Choices

FutureFoodS

23 projects selected for funding among 3 Topics:

## 1 The way towards sustainable and resilient food systems

### FULCRUM — C4
Food Systems Labs: Policy Coherence and Empowerment to Transform Food Systems within a Just Circular Bioeconomy

### TrueFoodS — C4
Transforming European Food Systems: Sustainability, Equity, Governance and Resilience as core elements

### RESHAPE — C4
Reshaping food systems: value change transformation through reconnection

### CREEP — C4
From creeping crisis to deliberate transformation: Building a resilient and sustainable food system in Nordic regions

### ENRESFOOD — C4
Ensure resilience of the food supply chain against safety and security shocks

### RegioFoodS — C4
From regional relevance to transnational value: how regional food systems can boost resilience and self-sufficiency in Nordic and Baltic countries

### BETRUE — C3
From Beef to bean: the potential of ‘true pricing’ as an instrument for systemic change in the transition to plant-based alternatives

## 2 New foods – Fostering innovations in food design, processing and supply via demand-and-supply reorientation

### MicroMar — C1
Sustainable processing of microbial and marine resources for novel food ingredients and products

### BlueGreenFood — C1
Innovating Sustainable and Healthy Food Alternatives: Expanding Europe's Food Palette through Seaweed and Plant-Based Proteins

### ALGAMAT — C1
Sustainable and Nutritious ALGAE-Based Burger Development

### FAF — C1
FUTURE-PROOF MICROALGAE-BASED FOODS

### HARMONI — C2
Hybrid Alternatives for Redefining Meat with Optimal Nutrition from Integrated Cell and Plant-Based Materials

### SpeedyFermHub — C2
Knowledge HUB for SPEEDY characterisation, optimisation and scale-up of FERMented, plant-based new foods improving resilience of European Food Systems

### Fermgut — C2
Fermented foods and gut health

### BIOPOM — C2
Biotechnological upcycling of fruit pomace into prebiotic food ingredients

### MIPRODESIGN — C2
Accelerating plant-based protein emulsion design with microfluidics and intelligent software tools for sustainable foods

## 3 Empowering sustainable food choices – Enabling environments and dietary shifts

### FOOD-FRAMES — C3
A system approach to reform the food information environment to support healthy, sustainable diets: mitigating harmful marketing and misinformation

### FoodTriggers — C3
Triggering societal tipping points for sustainable diets

### TIPRO — C3
Tipping the protein transition: Leveraging consumption, distribution and policy dynamics for sustainable dietary shifts

### TASTE — C3
True Cost Accounting for Sustainable Food Environments

### FoodEnvironments4Future — C3
Future-proof school-centric food environments

### SeaPlate — C1
From Sea to the Plate: European Brown Macroalgae as Innovative Additions to a Healthy and Sustainable Diet

### AI-ProFood — C4
AI-Driven Food Procurement: Shifting Paradigms for Sustainable and Inclusive School Canteens

**CLUSTER KEY**

- Cluster 1 · Algae, Marine Resources & Novel Ingredients
- Cluster 2 · Dietary Transformation, Consumption & Food Environments
- Cluster 3 · Food Systems, Governance, Resilience & Living Labs
- Cluster 4 · Food Technology, Fermentation & Product Innovation

Co-funded by the European Union

The European partnership for a sustainable Future of Food Systems is co-funded by the European Union’s Horizon Europe Programme under Grant Agreement 101136361

futurefoodspartnership.eu

# 2. Call - 2025: Accelerating Food Sustainability - through Household Dietary Shifts, Trust and Transparency, and Innovations in Circular Food Processing Systems

FutureFoodS

19 projects selected for funding among 3 Topics:

- preliminary –

Grant negotiations are ongoing
and final approval pending

## 1 Domestic food practices for enhancing sustainable and healthy diets

### TRANSMUTE
Reprogramming Fermentation for Nutritious and Tasty Plant-Based Foods

### BlueFoods
Rethinking Consumption of Blue Foods

### EATTOGETHER
Shaping Children's Healthy and Sustainable Eating Routine through the Lens of Playful Human-Food Interactions

### GoodDiet4All
Good diets for everyone: Exploring the potential of community-led initiatives to enable sustainable, healthy food choices for (vulnerable) households

### OIKOS
Co-Designing Collective and Just Food Futures

### CRAUT
Co-Creating Food System Transformation through Unlikely Alliances

## 2 Towards diverse, sustainable and circular food processing systems

### CIRCUBIO-FOOD
Circular Biotechnological Valorisation of Dairy Side Streams for Sustainable Food Systems

### HyProt
Integrated system for conversion of agro-industrial side streams into synergic hybrid protein products

### InnoCircDairy
Reimagining Dairy: Circular Casein Production and Dairy Product Design through Upcycling Side Streams and Precision Fermentation

### Safe2Ferment
Building Future Food Safety Networks for Circular and Sustainable Fermentation

### FoodEnzymeS
Mechano-enzymatic technologies for a sustainable, tasty and healthy diet

### CircusMeat
Decentralized Circular Sustainable Solutions for Cultured Meat Production

### ProQ-MIR
Protein quality mid-infrared inline analyzer

### BIOACTIVES4ALLERGY
Advanced sustainable bioactive food innovation targeting inflammation and food allergy

### BIOPRESERVE
Transforming the Food System for Sustainable and Safe Ready-to-Eat Foods Through Biopreservation, Predictive Tools and Stakeholder Trust

## 3 Importance of trust and transparency

### FIBREUP
Fibre Innovation and Building Responsible, Evidenced Upcycling

### MEAL-TRUST
Trusted information for healthier and more sustainable meals

### TRUEVALUE
Transforming Public Procurement Through True Cost Accounting for Sustainable Food Systems

### TRUSTINFOOD
Integrated sustainability communication to build consumer trust and value chain transparency
